

Flambeaux

GAS & ELECTRIC LIGHTS

www.flambeauxlighting.com

Our Mission

Old World Techniques-New World Style

- Flambeaux was founded by local New Orleanians. The beauty of growing up in a city like New Orleans is that its flooded with warm smiles, beautiful architecture and proud people. There is no way to grow up in New Orleans without it becoming the fabric of who the locals are as individuals.
- The owners have carried that warmth, pride, beauty and attention to detail into this business. Their objective was to make the best gas and electric copper lanterns in the industry, and to do it with local craftsman who work in a business as rich and strong as the city it's in.
- Every light, every craftsman and every client interaction are shaped by the skill, pride and drive that led the founding partners to open Flambeaux's doors over 20 years ago.

Featured in the picture above is our unique Tremé lantern with a Wall-Mounted Scroll Bracket and a square ceiling-mounted fixture.

The Flambeaux Lakeview Column Mounted Lanterns are an exquisite example of how we add a touch of beauty to any exterior entrance. See page 9 & 10 for more options.

We are Focused on the Details

- Lighting is one of the most important details to finish any space, and when a Flambeaux light is added to a home or business, not only does it bring a piece of the historic New Orleans French Quarter with it, but it adds a memorable, unique look that is tailored specifically for the space the lights will adorn for a lifetime.
- Our styles accommodate Nationally Registered Historic Homes, modern buildings and custom estates around the world.

Featured in the Picture to the right is one of our classic designs called The Manhattan. This is for our clients who love simplicity.

Quality Design

- At Flambeaux Gas & Electric Lights, our designs reflect a city famous for our blend of unique architectural styles. From creole cottages of the Marigny to grand mansions on St. Charles Avenue, the double galleries along Esplanade Avenue and to the balconies and parlors of the French Quarter.
- The styles of these landmark buildings greatly influence our craftsmanship of the finest Gas Lanterns and Electric Lighting you will find anywhere. Every one of our timeless designs are handcrafted and hand-riveted, emulating the heritage and historic flair of New Orleans.
- Flambeaux fixtures are built for both exterior lighting as well as interior decor. We are continually creating new styles of lanterns. We also build custom fixtures for those who have something unique in mind.

The Bourbon Street Lantern shown here with a stylish hanging yoke bracket can hang from almost any type of ceiling.
